

## CDP Deployment Process (interaction between repos)

## CDP Deployment Process (interaction between repos)

Uses cdp-ci image

docker-cdp-ci

### cdp-environments

.drone.yml

Uses docker-cdp-ci image

Runs deploy.sh using local deploy/kustomization.yaml

Runs test.sh using local test/kustomization.yaml

environments/<env>/...

deploy/kustomization.yaml

test/kustomization.yaml

cdp-version

conf.cfg

Uses templates

cdp-deployment-templates

## CDP Deployment Process (interaction between repos)

Uses cdp-ci image

docker-cdp-ci

### cdp-environments

.drone.yml

Uses docker-cdp-ci image

Runs deploy.sh using local **deploy/kustomization.yaml**

Runs test.sh using local **test/kustomization.yaml**

environments/<env>/...

**deploy/kustomization.yaml** -> defines what to run

**test/kustomization.yaml** -> defines what to test

cdp-version

conf.cfg

Uses templates

cdp-deployment-templates

CDP Deployment Process (interaction between repos)

Uses cdp-ci image

### docker-cdp-ci

#### deploy.sh

- clones cdp-deployment-templates
- kustomize
- kubectl apply

#### test.sh

- clones cdp-deployment-templates
- kustomize
- kubectl create (job running bzt)

### cdp-environments

.drone.yml

Uses **docker-cdp-ci** image

Runs **deploy.sh** using local **deploy/kustomization.yaml**

Runs **test.sh** using local **test/kustomization.yaml**

environments/<env>/...

**deploy/kustomization.yaml**

**test/kustomization.yaml**

cdp-version

conf.cfg

Uses templates

cdp-deployment-templates

## CDP Deployment Process (interaction between repos)

Uses cdp-ci image

### docker-cdp-ci

#### deploy.sh

- clones cdp-deployment-templates
- kustomize
- kubectl apply

#### test.sh

- clones cdp-deployment-templates
- kustomize
- kubectl create (job running bzt)

### cdp-environments

.drone.yml

Uses **docker-cdp-ci** image

Runs **deploy.sh** using local **deploy/kustomization.yaml**

Runs **test.sh** using local **test/kustomization.yaml**

environments/<env>/...

**deploy/kustomization.yaml**

**test/kustomization.yaml**

**cdp-version**

conf.cfg -> **vars/...** overrides

Uses templates from  
**cdp-version** tag

### cdp-deployment-templates

k8s-templates/...

k8s-perf-tests/...

**vars/...**

conf-template/...

manifest/...
